

Outdoor Family Fun: Conker Shampoo

Barking &
Dagenham

COUNTRY
PARKS

It's conker season, what do you do with yours? Instead of leaving them to go wrinkly why not try making conker & coconut shampoo!

Conkers, the nuts from the horse chestnut tree, are full of saponin.

Saponin is a soap like substance - it cleans! Cut 20 conkers into 1/4's.

Add 500ml of water, bring to boil & simmer with lid on for 25mins.

Drain & reserve liquid. You can freeze it now for later use, or.....

Add 1 can of coconut milk & mix then refrigerate till cool.

Bottle & use within a month. Essential oils can be added if desired.
